How might we Design an Personal Expense Tracker?

### **Team Leader**

able to scan bills the bill to the expenses automatically

the expenses we did should be ordered from user can see where he\she spends more,

Points should be when the user uploads bills, expenses, and other instances when he/receives money to encourage the user in finacial management

> budget like travel budgets

## 910019106016

An alert will be sent to the user

the application will will be sent to the user

If the user have any of the hildren, etc this app will make

which helps the user to then the wants.

in the dashboard

according to the income ,if the the app will give an option to save or spend the amount

balance amount .

## 910019106023

The user can link the bank account with the application and then the application penditure and shows them

there's a tab or an

910019106703

List financial

# Reports

user can see where he\sh

then the wants.

# Future planning

If the user have any of the monthly

take from the savings but the app the amount which is expended on

# Quality Improvements

Numerous

## Alerts and Notifications

device

## Motivation for finacial management

Points should be awarded in the app bills, expenses, and encourage the user in

# Automation

and then the application monitors the income and expenditure and shows them in the dashboard

expenses automatically with description

**Importance** 

If each of these

tasks could get

done without any

difficulty or cost,

which would have

the most positive

Numerous

can be

free.

If there is an emergency financial

need for any purpose, the user can

take from the savings but the app

the amount which is expended on

the further months by saving more.

sent to the user

the amount which is declared, then

the app will give an option to save

If the user have any of the

monthly

budgets
